

SUPPLEMENTARY MATERIAL

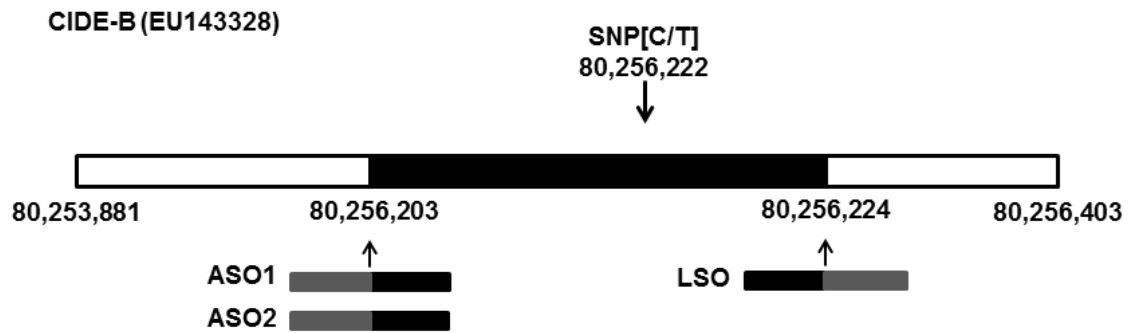

Figure S1. Position of oligonucleotides for genotype analysis. *CIDE-B* genotype analysis was performed using Veracode Golden Gate assay kit (Illumina). Chromosome start, end, and SNP position of *CIDE-B* are indicated. Genotype was analyzed using three oligonucleotides - Allele-specific Oligo 1 (ASO1), Allele-specific Oligo 2 (ASO2), and Locus-specific Oligo (LSO) - of chromosome positions.
